3 Background

Approval for registration of a WARP by CPNI is determined by the conditions described and proposed in the registration application form. When the WARP becomes operational, or even whilst it still under development, it is quite possible that the WARP Provider may wish to change some of these conditions to improve the effectiveness or efficiency of the WARP. CPNI will need to consider the implications of any significant changes.

Expansions, or changes to, the make-up of the WARP member community in particular, need to be approved for continued registration.

Information provided on this form will enable CPNI to assess the implications of proposed changes.
